

DayRay

A NEW RAY OF

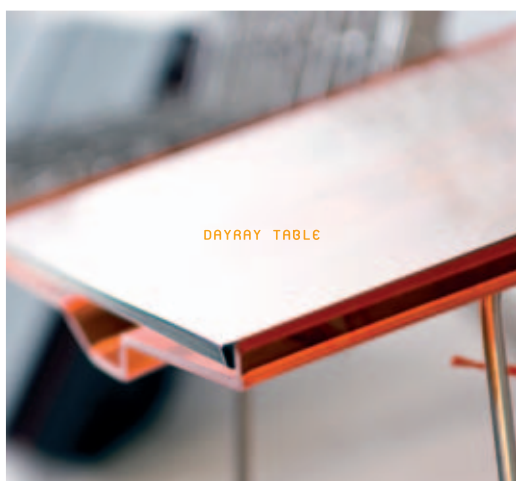

DayRay is a new collection of interior design products manufactured exclusively from acrylic. The features of acrylic – transparency and depth of colour – are unique and add an exciting dimension to contemporary interiors. We laser-cut components which are then processed by hand into the finished design. Development and production take place exclusively at our plant in Anderstorp in close collaboration with designer Dan Ihreborn.

LIGHT

DayRay är en ny kollektion inredningsprodukter som alla är tillverkade av akryl. Akrylplastens egenskaper – transparens och färgdjup – är unika och adderar ett spännande uttryck till dagens moderna inredningar. Vi laserskär ut komponenter som sedan bearbetas för hand till färdig form. All utveckling och produktion sker i vår fabrik i Anderstorp i ett nära samarbete med formgivaren Dan Ihreborn.

Colours: 01 / 02 / 03 / 04 / 05 / 06

Acrylic is an invigorating material that both reflects and absorbs light. A carefully planned lighting arrangement gives DayRay products an extra dimension, resulting in a striking colour scheme that brings the whole setting to life. (Please note that colour deviations could occur.)

-01 Frost

-04 Green

-03 Orange

-06 Grey

-02 Red

-05 Blue

Akryl är ett spännande material som både reflekterar och släpper igenom ljus. En genomtänkt ljussättning ger DayRay-produkterna en extra dimension som effektivt färgsätter och ger omgivningen liv. (Observera att färgavvikelser kan förekomma.)
